

Maintenance and Construction

Every working day Gold Coast City Council is fixing footpaths, tending parks and making decisions that shape the future of the Gold Coast.

Our people are responsible for ensuring our city infrastructure and community facilities are second to none. To achieve this, specialist staff are employed in the following areas:

Maintenance

Our teams are responsible for the maintenance of city buildings, bridges, parks, landscapes, roads, footpaths, beaches, and stormwater drainage. They maintain everything from cleaning BBQ's and amenity blocks, to removing graffiti and clearing storm water drains.

Construction

With close to 1000 individual projects scheduled this year, our "can do" construction teams are responsible for the construction of a diverse range of projects relating to drainage, parks, roads, bridges, footpaths, and landscaping. Part of our construction team is also responsible for the management of Council's highly successful hard rock quarry, which mines approximately

300,000 tonnes of A grade pavement material each year for both Council and external clients.

To maintain and develop the city's assets and natural environment, our people come from a range of different trades and labour backgrounds, including:

- Electrical
- Mechanics
- Panel beating
- Plumbing
- Fitting and turning
- Carpentry
- Automotive, and
- General labour positions.

The Gold Coast City Council is working hard to build a vibrant city now and into the future.

Build your own *future* with Gold Coast City Council!
