

Project Managers

With a boundary stretching from Yatala and Stapylton in the north to Tallebudgera Valley and Coolangatta in the south, our city projects have substantial impact on the community, environment and economic development of the Gold Coast.

GCCC project managers are responsible for providing services to manage or support these major projects from concept or feasibility stage to implementation and completion.

For example, key projects that our people have been involved on have included:

- Gold Coast City Marine Precinct
- Skilled Park football stadium
- Varsity Lakes Master Plan
- Long-term Dredging Strategy for our city

The role of Project Managers:

Every day is different for a project manager at GCCC. Depending on the project at hand, a day's work could include:

- conceptual design and development
- impact assessment
- liaising with the community, Government agencies or key private sector stakeholders

- co-ordinating people, technology and resources, and
- translating business goals into activities.

In fact, the diversity of projects both within the community and within Council itself means that no two project management jobs are the same. Becoming a project custodian at Gold Coast City Council is a critical business activity in meeting the needs of the community.

Manage your own *career opportunities* by working at GCCC!
