Gravity sewer relining

Scheduled sewer maintenance work will be undertaken throughout the city as part of the infrastructure renewal program. The program of work involves relining of sewerage pipelines at multiple sites.

The work at each site will be carried out in three stages — pipe cleaning, pipe relining and visual inspection. Each scope of work is expected to be carried out over a one to two week period. It is expected that the work detailed above will be restricted to the road reserve and to the vicinity of the sewer maintenance holes.

Impact

Due to the nature of this work and the equipment used, some odour and noise may occur in your area, however this will be temporary. Partial road closures may be necessary — motorists and pedestrians are urged to follow the directions of traffic control officers on site. If access to a maintenance hole on your property is required you will be contacted by a City representative. Please note that all City officers and contractors carry identification on them at all times.

Thank you for your cooperation and understanding while the work is in progress. If you require further information please call our Customer Contact Centre on 07 5667 5801 or 1300 000 928.

Project duration:
September 2019 to mid-May 2021

Hours of work:
7am to 5pm Monday to Friday excluding public holidays.
