

# BE SMART CHOOSE TAP<sup>®</sup>

Australians spend over **\$680 million** per year on bottled water.

Water refill stations provide **free, safe and accessible tap** water across our city.

**Plastic bottles** are the most littered item in Gold Coast waterways.

Tap water is the **best choice** for your health, the environment and your hip pocket.

Gold Coast tap water is of the **highest quality** and exceeds Australian Drinking Water Standards and Guidelines.

The City of Gold Coast is helping customers to enjoy healthy, environmentally responsible and low-cost hydration through Choose Tap.

Choose Tap plays a valuable role supporting community sport, local festivals, education, parks and gardens, the health sector, the business sector and cafes and restaurants.

Water refill stations are installed in public spaces so our community has access to free drinking water where it needs it most.

By choosing tap water over bottled water, we are also reducing the impact on our environment and diverting plastic from landfill. Choosing tap helps protect our beautiful beaches and waterways, preserve our precious natural landscapes and protect our wildlife habitats.

Be Smart, Choose Tap.
