

# NOTICE OF WORKS

## Water Main Replacements – Nerang

### WHAT IS HAPPENING?

City of Gold Coast is replacing water mains along a section of Crusader Way at Nerang (see map overleaf for further information).

The mains are reaching the end of their design life and are being replaced to ensure residents continue to have a reliable water supply.

Works involve removing the existing mains and installing new water pipes via an open trench construction method.

A temporary above-ground water pipe will be used to maintain water supply to properties during the works. It will provide the same quality drinking water as the existing mains. Crossing ramps will be installed to protect the pipe and maintain property access.

Our water services delivery partner, GCISolutions, will carry out these works on our behalf.

### WHEN IS IT HAPPENING?

Works are scheduled to start in mid-September 2023 and are expected to be completed in November 2023 (pending site and weather conditions).

Works will generally be carried out between 7am and 5pm Monday to Friday, excluding public holidays.

Due to the nature of the works, some activities may need to be conducted after hours at times. We will endeavour to notify residents in advance should this occur.

### WHAT CAN I EXPECT?

Our site personnel will make every effort to reduce impacts on residents as much as practical during the works. However, you may notice the following localised construction impacts:

- Increased levels of noise and dust. The site team will implement measures to minimise these impacts as much as possible.
- Changed traffic conditions including reduced speed limits and temporary lane closures. Traffic controllers will be available during construction working hours to assist motorists.
- Temporary water supply interruptions. We will notify residents of these interruptions in writing at least 48 hours in advance.
- A slight reduction in water pressure during the use of the temporary water supply pipe.
- Temporary driveway access restrictions at times. Affected residents will be notified in advance so alternative arrangements can be made if needed.
- Temporary footpath closures. Alternative pedestrian access will be clearly signed, and site representatives will be available during construction working hours to assist pedestrians as needed.

We thank you for your understanding and patience while we carry out these essential works.
